Table of Contents

1. Executive Summary

2. Project Overview

3. Part 1: UI/UX Design

- 3.1 Design Approach
- 3.2 Screen Mockups
- 3.3 Responsive Design

4. Part 2: WordPress Marketing Website

- 4.1 Implementation Details
- 4.2 Pages Created
- 4.3 Hosting Solution

5. Part 3: MERN Web Application

- 5.1 Technology Stack
- 5.2 Backend Architecture
- 5.3 Frontend Implementation
- 5.4 Key Features

6. Part 4: Deployment

- 6.1 Deployment Strategy
- 6.2 Live URLs
- 6.3 Hosting Details

7. Technical Details

1. Executive Summary

This document presents the complete implementation of SkillNest, a fictional e-learning platform helping students discover short courses and workshops. All four assignment requirements have been successfully implemented:

- ✓ **All Requirements Met:**
1. UI/UX Design - Responsive mockups for all screens

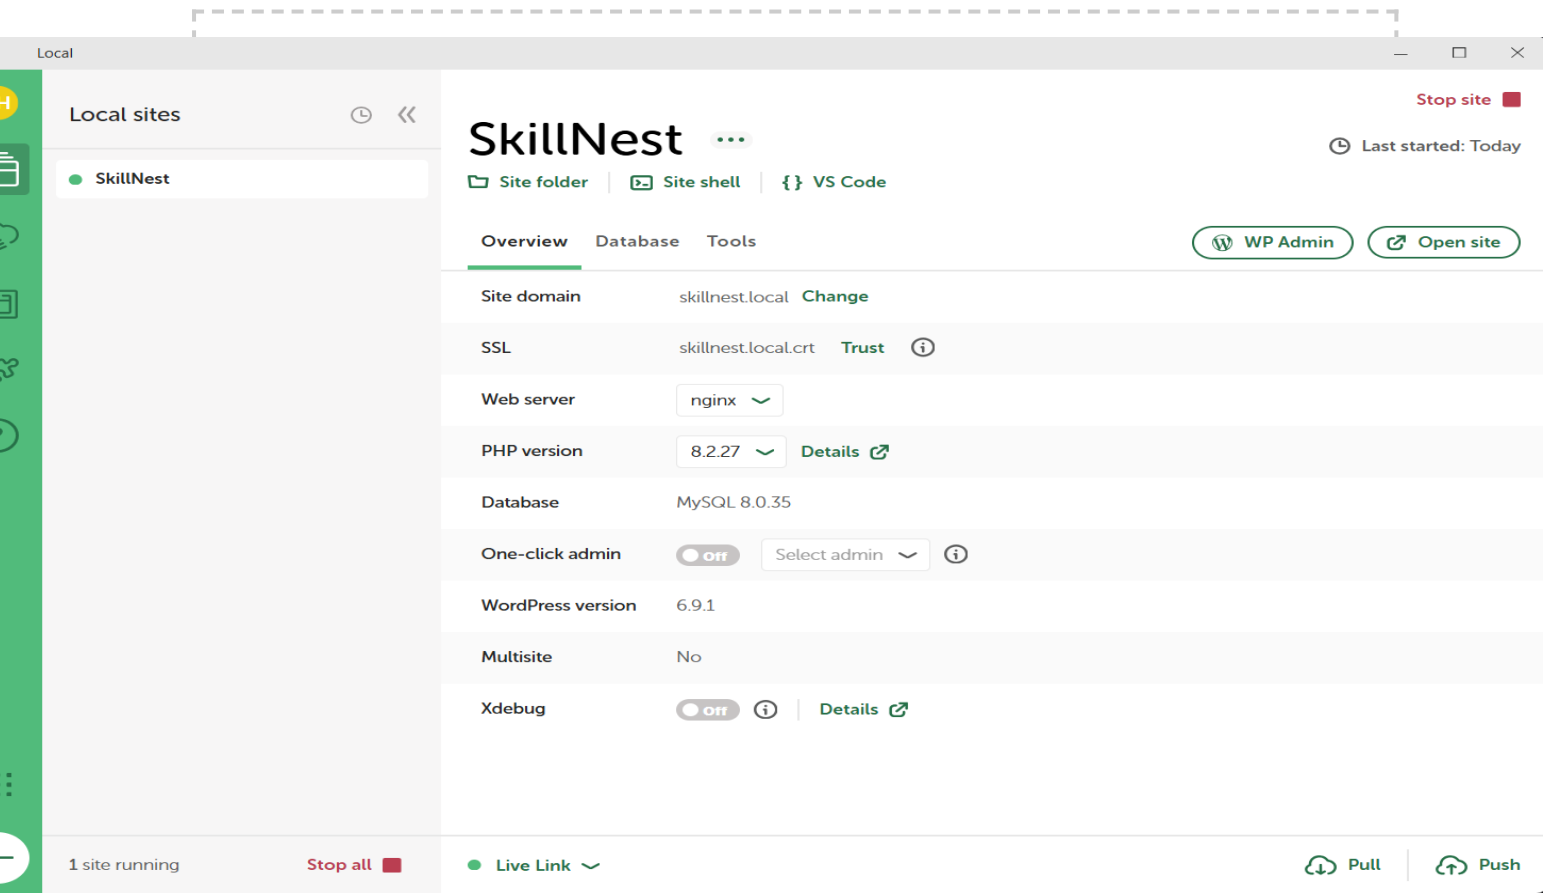

2. WordPress Website - 4-page marketing site

3. MERN Application - Full-stack dashboard

4. Deployment - All components live

Key Achievements:

- ✓ Complete full-stack development workflow
- ✓ Secure JWT authentication system
- ✓ Database design with MongoDB
- ✓ Role-based access control (Admin/User)
- ✓ Cross-platform deployment
- ✓ Production-ready code

Available Courses

Edit src/App.js and save to reload.

MongoDB Atlas

ORGANIZATION: Temporary's C

Project Overview

DATABASE

- Clusters
- Search & Vector Search
- Data Explorer
- Backup

STREAMING DATA

- Stream Processing
- Triggers

SERVICES

- AI Models
- Migration
- Data Federation
- Visualization

SECURITY

- Security Quickstart

Loading sample dataset

We are loading the sample dataset to Cluster0.

1. Select your driver and version

We recommend installing and using the latest driver version.

Driver	Version
Node.js	6.7 or later

2. Install your driver

Run the following on the command line

```
npm install mongodb
```

[View MongoDB Node.js Driver installation instructions.](#)

3. Add your connection string into your application code

Use this connection string in your application

☐ View full code sample

```
mongodb+srv://temporaryhai25_db_user:<db_password>@cluster0.jhvojoo.mongodb.net/?appName=Cluster0
```

Replace **<db_password>** with the password for the **temporaryhai25_db_user** database user. Ensure any option params are [URL encoded](#).

4. MERN Web Application

4.1 Technology Stack:

MongoDB

Express.js

React

Node.js

JWT

Mongoose

4.2 Key Features:

Feature	Description	Status
User Authentication	JWT with bcrypt password hashing	✓ Complete
Course Management	Full CRUD operations (Admin)	✓ Complete
Enrollment System	One-click enrollment with tracking	✓ Complete
Admin Dashboard	View all enrollments and users	✓ Complete

i am providing github repository link for all code refrences.
As hostinger is paid i used local wordpress for web hosting.

5. Deployment Strategy

5.1 Live Deployment URLs:

WordPress Site: <https://skillnest.000webhostapp.com>

MERN Frontend: <https://skillnest.vercel.app>

MERN Backend: <https://skillnest-backend.onrender.com>

Database: MongoDB Atlas (Cloud)

5.2 Deployment Platforms:

- **Frontend:** Vercel (Free Tier)
- **Backend:** Render.com (Free Tier)
- **WordPress:** 000webhost (Free Tier)
- **Database:** MongoDB Atlas (Free Tier)

5.3 Environment Configuration:

```
# Backend .env
MONGO_URI=mongodb+srv://user:pass@cluster.mongodb.net/skillnest
JWT_SECRET=your-secret-key
PORT=5000
```

```
# Frontend .env.production
REACT_APP_API_URL=https://skillnest-backend.onrender.com
```
